Welcome to the VioSphere

Designed to save time, money, space and energy, the state-of-the-art VioSphere is a complete home electronics ecosystem. The first product to combine the capabilities of a full spectrum high definition TV with an i3 or optional i5 or i7 processor based PC, the VioSphere delivers unlimited options to the entire family.

The VioSphere has no boundaries

Multi-tasking is rendered effortless with the use of split screen or multiple screen technology. The VioSphere's touchscreen feature allows for easy navigation through numerous applications. Enjoy online gaming, streaming the latest videos on demand, video chats with distant loved ones or designing your own PC experience while watching your favorite TV shows simultaneously. With the VioSphere, the interactive combinations are endless. Sleek and stylish, the VioSphere is robust enough to fulfill residential and professional needs.

"This is what evolution looks like"
